Net-Zero Commitment documents for [insert asset owner name]

My organisation commits to

- supporting the goals of the Paris Agreement through our investor activities and our portfolios, in line with our individual mandate.
- contributing to the global transition toward net-zero GHG emissions by 2050, in line with the objective of limiting global temperature rise to 1.5°C above pre-industrial temperatures by 2100, and to transition our investment portfolios to net-zero accordingly.
- taking into account the transition of the real economy and the best available scientific knowledge, including the findings of the IPCC.
- regularly reporting on progress, including establishing intermediate targets every five years in line with Paris Agreement Article 4.9.

My Organisation fully endorses and understands that

- in order to meet our fiduciary duty to manage risks and achieve target returns, this Commitment must be embedded in a holistic approach to managing sustainability considerations, incorporating but not limited to climate change.

My Organisation will

- seek to deliver on this Commitment, especially through advocating for, and engaging on, corporate and industry action, as well as public policies, for a low-carbon transition of economic sectors informed by science and under consideration of associated social implications.

My Organisation's delivery on this Commitment is dependent on

- supportive national and international government policies and on governments following through on their own NDCs and other commitments to ensure the objectives of the Paris Agreement are met.

This Net-Zero Commitment is made by individual asset owners to their stakeholders, including beneficiaries and/or shareholders, as part of their overall sustainability strategy
