& ENVIRONMENT

UNEP FINANCE INITIATIVE

Over the years, the GRT has become the key agenda-setting event on sustainable finance, bringing together leaders from the financial world, civil society, academia, government and the U.N. The 14th edition of the GRT will build on the Sustainable Development Goals (SDGs) and the Paris Climate Agreement which were successfully agreed to in in 2015.

At this vitally important gathering of global green economy leaders participants will identify ways for the finance community to become catalysts for sustainable, climate resilient development.

# 25 & 26 OCTOBER 2016
## DUBAI, UNITED ARAB EMIRATES

**The 2016 GRT will ask and answer some of the most pressing questions facing the finance sector today:**

- What do the new sustainable development and climate change agendas mean for the finance sector?
- How can the sector become a driver of sustainable development?
- What does Green Islamic finance look like? How can it be up-scaled?
- What leading-edge business opportunities are emerging?
- How are policy and technology innovations changing the future of sustainable finance?
- How can the transition to sustainability in the financial sector be accelerated?
- How can emerging environmental and social risks be better quantified?
