## About the UNEP Finance Initiative (UNEP FI)

The United Nations Environment Programme Finance Initiative (UNEP FI) is a global partnership between the United Nations Environment Programme and the private financial sector. UNEP FI works closely with the 180 financial institutions that are Signatories to the UNEP FI Statements, and a range of partner organisations, to develop and promote linkages between the environment, sustainability and financial performance. Through regional activities, a comprehensive work programme, training activities and research, UNEP FI carries out its mission to identify, promote, and realise the adoption of best environmental and sustainability practice at all levels of financial institution operations.

## About the UNEP FI Water & Finance Work Stream

The UNEP FI Water & Finance Work Stream aims to create awareness and capacity among financial institutions in order to promote their proactive approach towards water issues, both in the area of water-supply and sanitation as well as with regards to water as a production factor in businesses downstream.

This is done by identifying and addressing the common grounds between the commercial objectives of financial institutions and the water sustainability goals of society at large.

## Project teams

### **Project team at the United Nations Environment Programme Finance Initiative (UNEP FI)**

Head of Unit	Paul Clements-Hunt
Project Lead	Remco Fischer
Project Team	Susan Steinhagen, Leonie Goodwin, Sarah-Kristin Klein

### **Project team at Arup**

Project Director	Justin Abbott
Project Manager	Matthias Retter
Project Team	Virginia Hooper, Rory Padfield, Elaine Trimble, Jean Rogers, Matheus Martins
Extended team	Jennie Barron, Stockholm Environment Institute Tim aus der Beek, University of Kassel

**United Nations Environment Programme  
Finance Initiative (UNEP FI)**

**UNEP FI is a strategic public-private partnership between UNEP and the global financial sector. UNEP works with over 180 banks, insurers and investment firms, and a range of partner organisations, to understand the impacts of environmental, social and governance issues on financial performance and sustainable development.**

**Through a comprehensive work programme encompassing research, training, events and regional activities, UNEP FI carries out its mission to identify, promote and realise the adoption of best environmental and sustainability practice at all levels of financial institution operations.**
