Webinars and Opportunities

Open for Registration | The Risk Centre's 2027 sustainability risk integration programme

This is an opportunity for risk professionals at banks and insurers to deepen their understanding and management of sustainability risks to build organizational resilience. N***ote: there is an additional fee associated with participation in the sustainability risk integration programme***.

Register here

Launch | 20 November 2026 | UNEP FI Water Risk Clinic

A pre-recorded Water Risk Clinic will be launched, aimed at strengthening financial institutions' understanding of water as a systemic financial risk, moving beyond an ESG or impact framing to consider implications for risk management and financial decision-making.

Resources

Tool | Explore the Risk Centre's new and improved Sustainability Risk Tools Dashboard

Intended to support initial discovery, shortlisting and further investigation, the dashboard provides structured information useful for mapping out the expanding field of sustainability risk tools and solutions. Explore the tool. Watch recording of launch webinar.

Reports | Enhancing sustainability-related disclosures

The Risk Centre has developed a series of resources to help risk professionals at financial institutions better understand and use sustainability-related disclosures within prudential risk management. This includes a toolkit, three topic-specific briefings, and a report summarising the resources. Download resources. Watch recording of launch webinar.
