

VERIJGE EN DUURZAME VOEDSELVOORZIENING

ECONOMISCHE PARTICIPATIE EN TOEGANG TOT FINANCIËLE DIENSTEN

SCHONE PRODUCTIE METHODEN EN DUURZAME ENERGIE

SAMENWERKING IN LOKALE GEMEENSCHAPPEN

RABOBANK EN DUURZAAMHEID  
Zo zit dat!

Samen werken aan een duurzame toekomst.  
Dat is het idee.

*Rabobank. Een bank met ideeën.*

A pair of hands, one from the bottom and one from the side, are gently holding a small, realistic-looking globe of the Earth. The globe shows blue oceans, green continents, and white clouds. The background is dark, making the globe and hands stand out.

We hebben één planeet:

**1,0**

We gebruiken er momenteel:

**1,3**

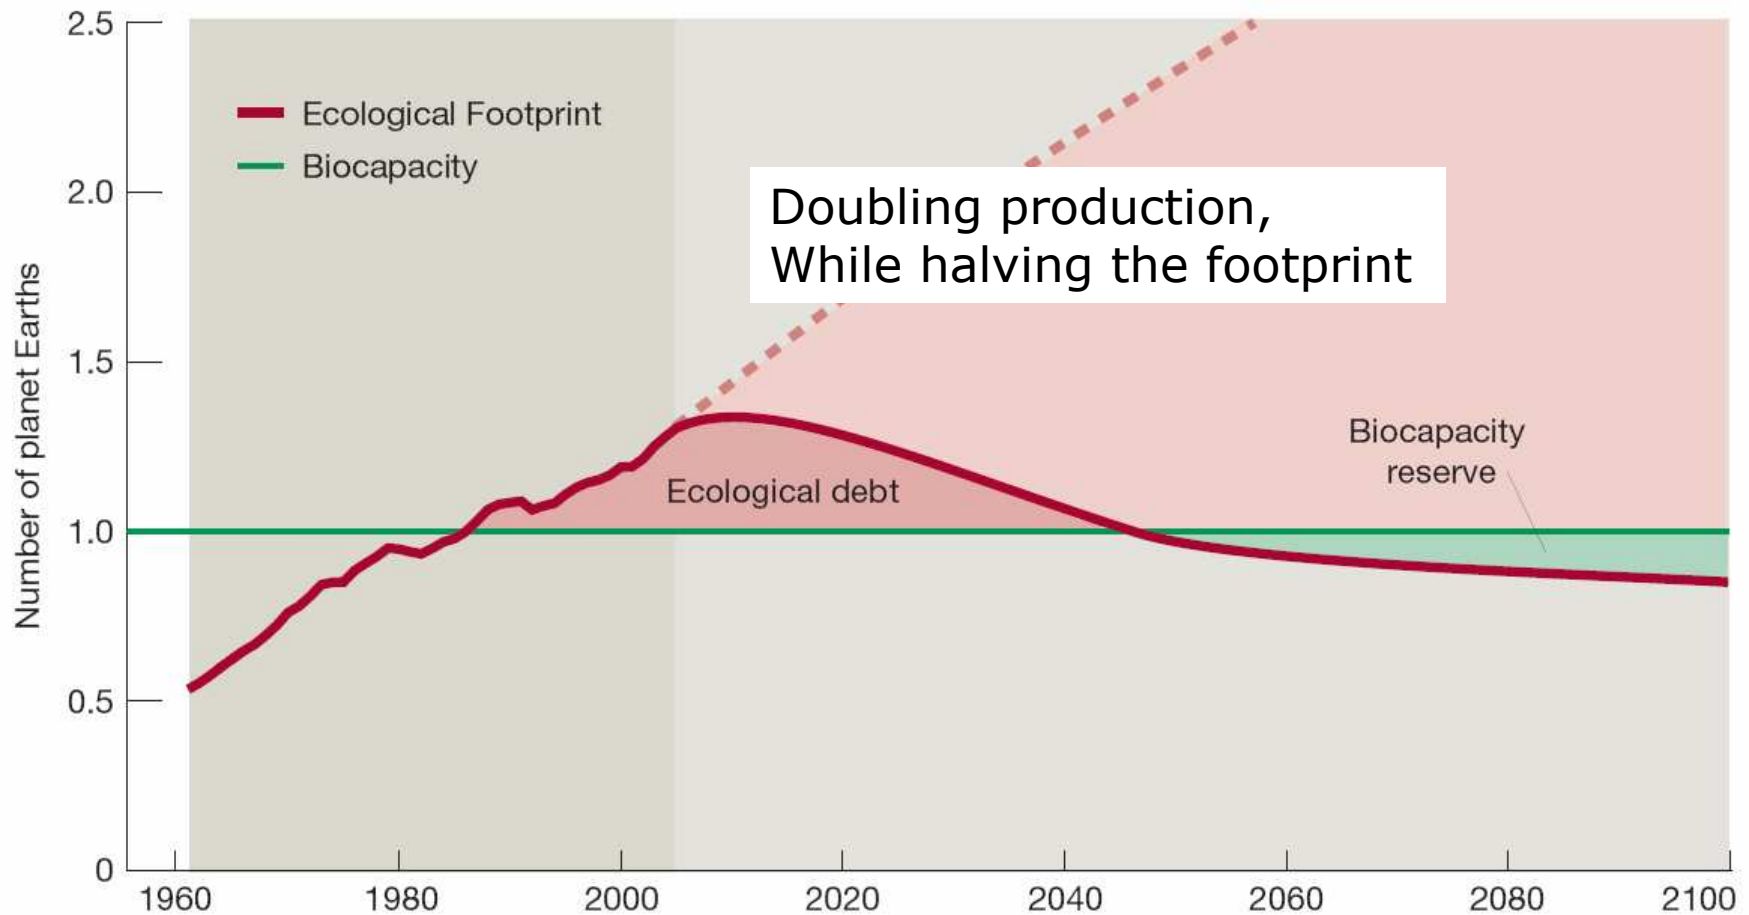

A pair of hands, one from a darker-skinned person and one from a lighter-skinned person, are gently holding a small, realistic-looking globe of the Earth. The globe shows blue oceans, green continents, and white clouds. The background is dark.

We hebben er in 2040 nodig:

4,0

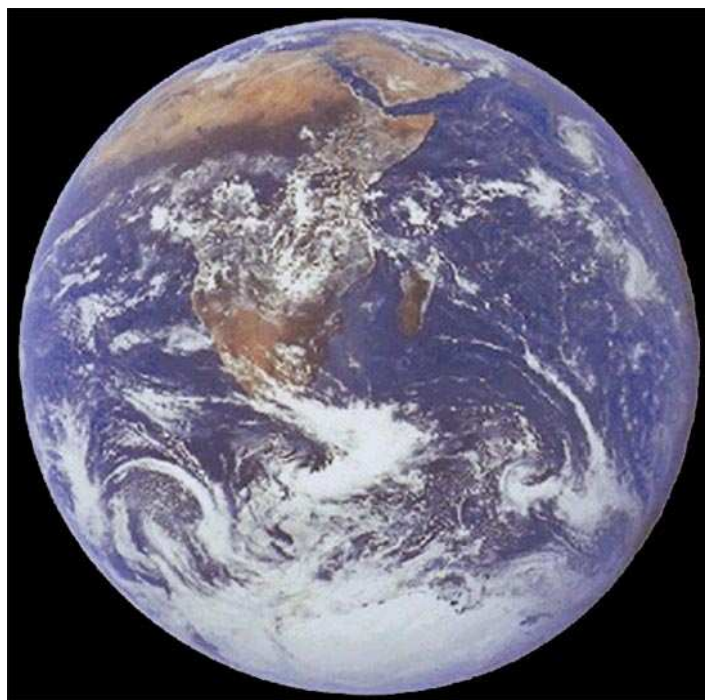

# Return to sustainability

by obeying the 'rules of the house' (eco-nomy)

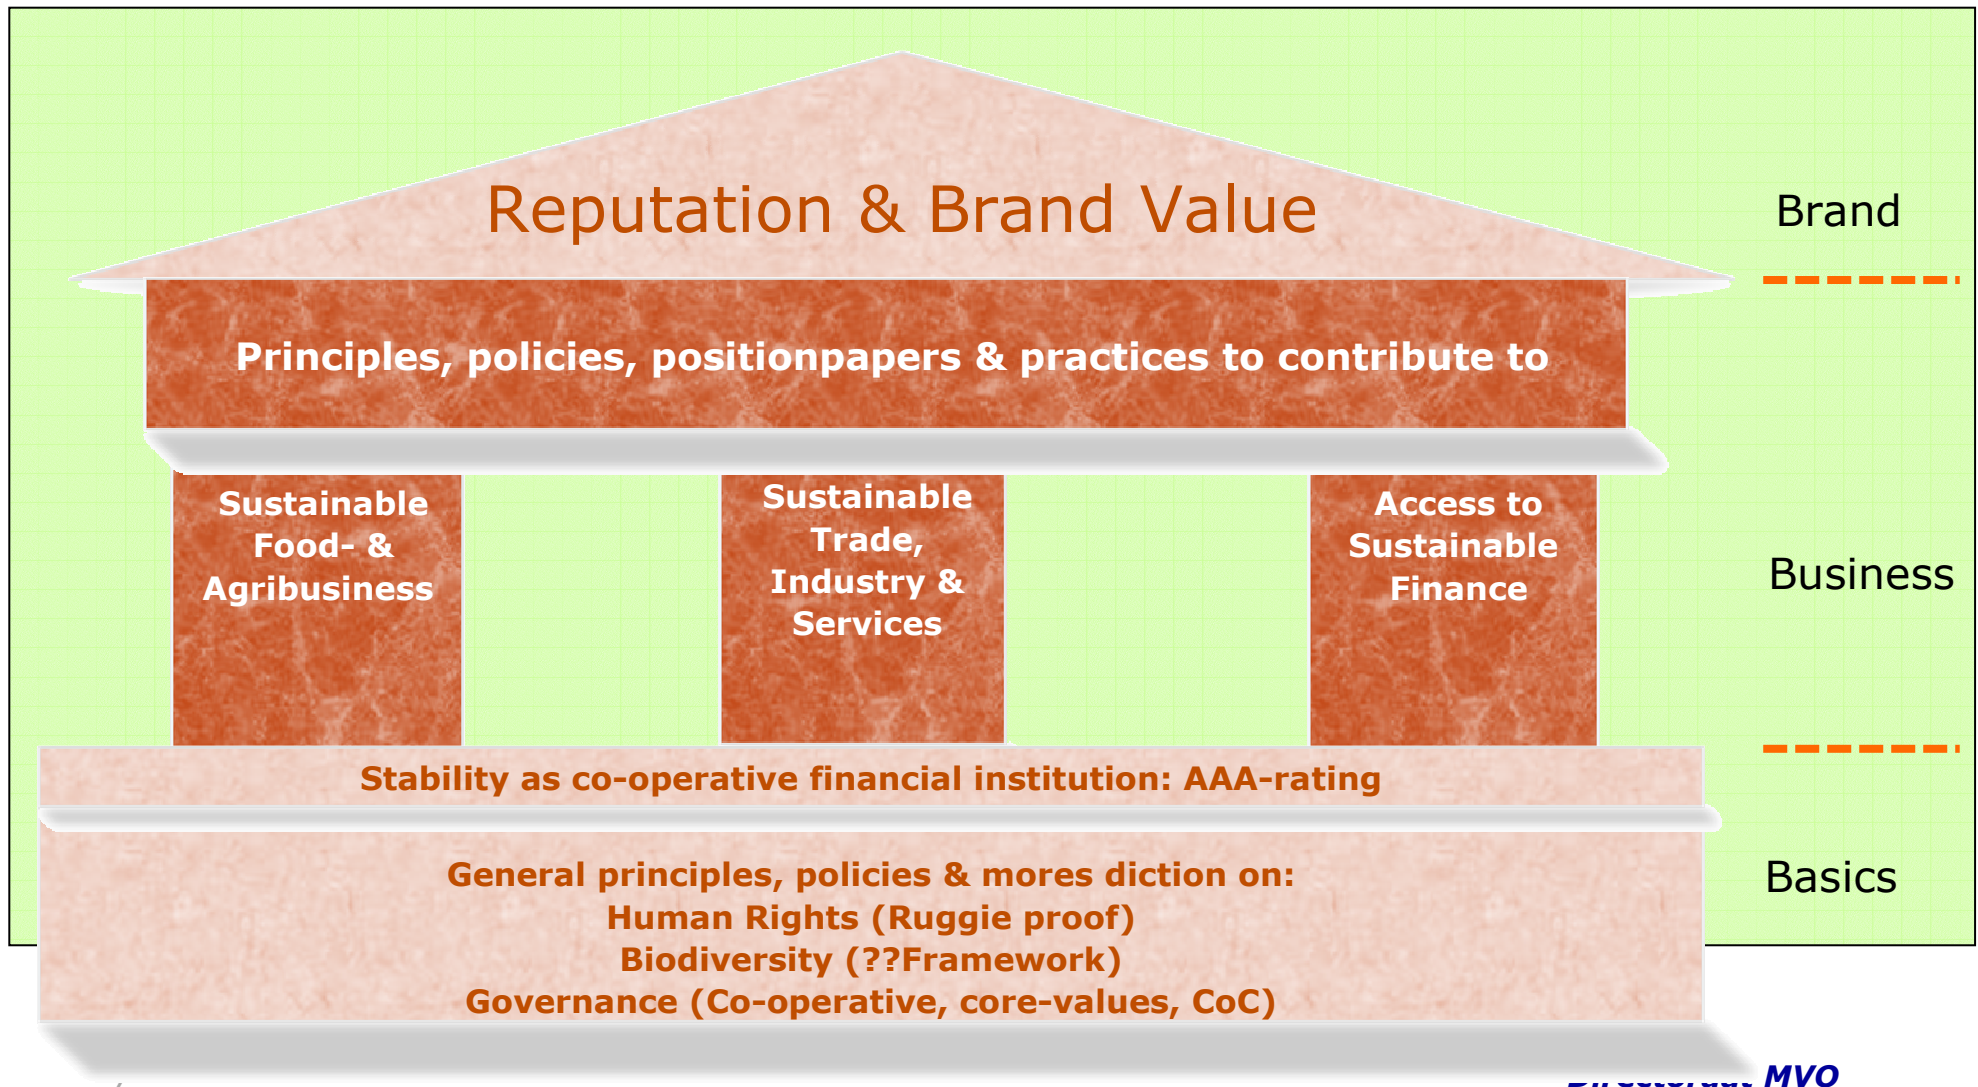

WWF – living planet report 2008

Dè uitdaging: Hoe voeden we 9 mrd monden en de economie duurzaam?

# Basics, Business and Brand

# Food & Agribusiness Principles

Five Food & Agribusiness Principles for the Rabobank Group:

1. Aiming for food safety and food security
2. Using natural resources responsibly
3. Promoting social welfare
4. Treating animals responsibly
5. Contributing to enable consumers to make well-considered choices

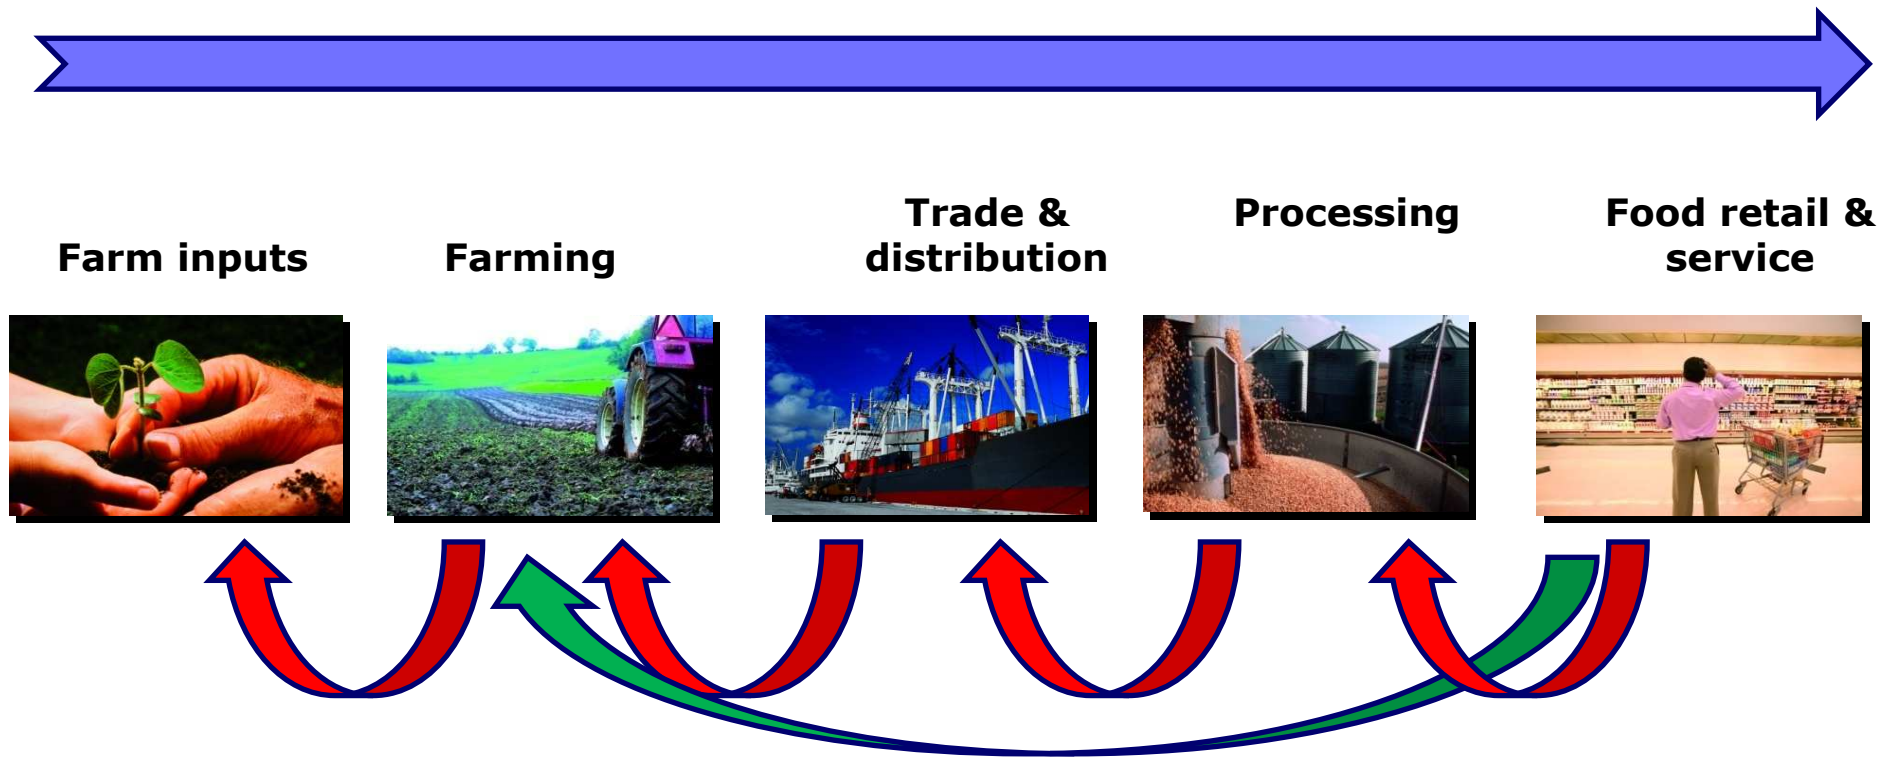

## Principle 2: Using natural resources responsibly

- |  |
|--|
| • Prevent land degradation and soil erosion                          |
| • Minimise pollution of ground and surface water                     |
| • Make careful use of available water                                |
| • Prevent over-fishing   |
| • Minimise harm to sea-life environment                              |
| • Preserve high conservation value areas and biodiversity in general |
| • Minimise genetic pollution of natural populations                  |
| • Minimise greenhouse gas emissions                                  |
| • Minimise waste   |

# Goal F&A Principles

Supporting clients in their transition to sustainable business practices

# Biodiversity & Ecosystem Policy

“Striking a CSR balance in financial decisions”

1. Context: objectives and scope
2. Relevance BES for Rabobank
3. Impact and dependence of companies on BES
4. Rabobank Group’s values & recommendations on BES:
  1. Governance, processes
  2. Policy & strategy
  3. Management & implementation
  4. Competitive advantage
  5. Transparency
5. Annexes

# Partnerschap Rabobank en WNF ondertekend

**NEW**

30-01-2011

De Rabobank en het Wereld Natuur Fonds (WNF) gaan een nieuw partnerschap aan. De samenwerking is gericht op internationale voedsel- en landbouwketens. Het doel is om deze ketens te verduurzamer door middel van gezamenlijke projecten.

# How to invest in Sustainable Forestry?

Investment decisions will be guided by:

**SAM's proprietary Sustainability Assessment** of a fund's track record and current strategy as well as a fund's main investments with regards to issues such as stakeholder engagement, crisis management, biodiversity, water, climate change, forest management, employee relationships, occupational health and safety, governance, and other.

## Rabobank: Forestry Supply Chain Policy

sets clear conditions for investments, encourages transparency, and good practices.

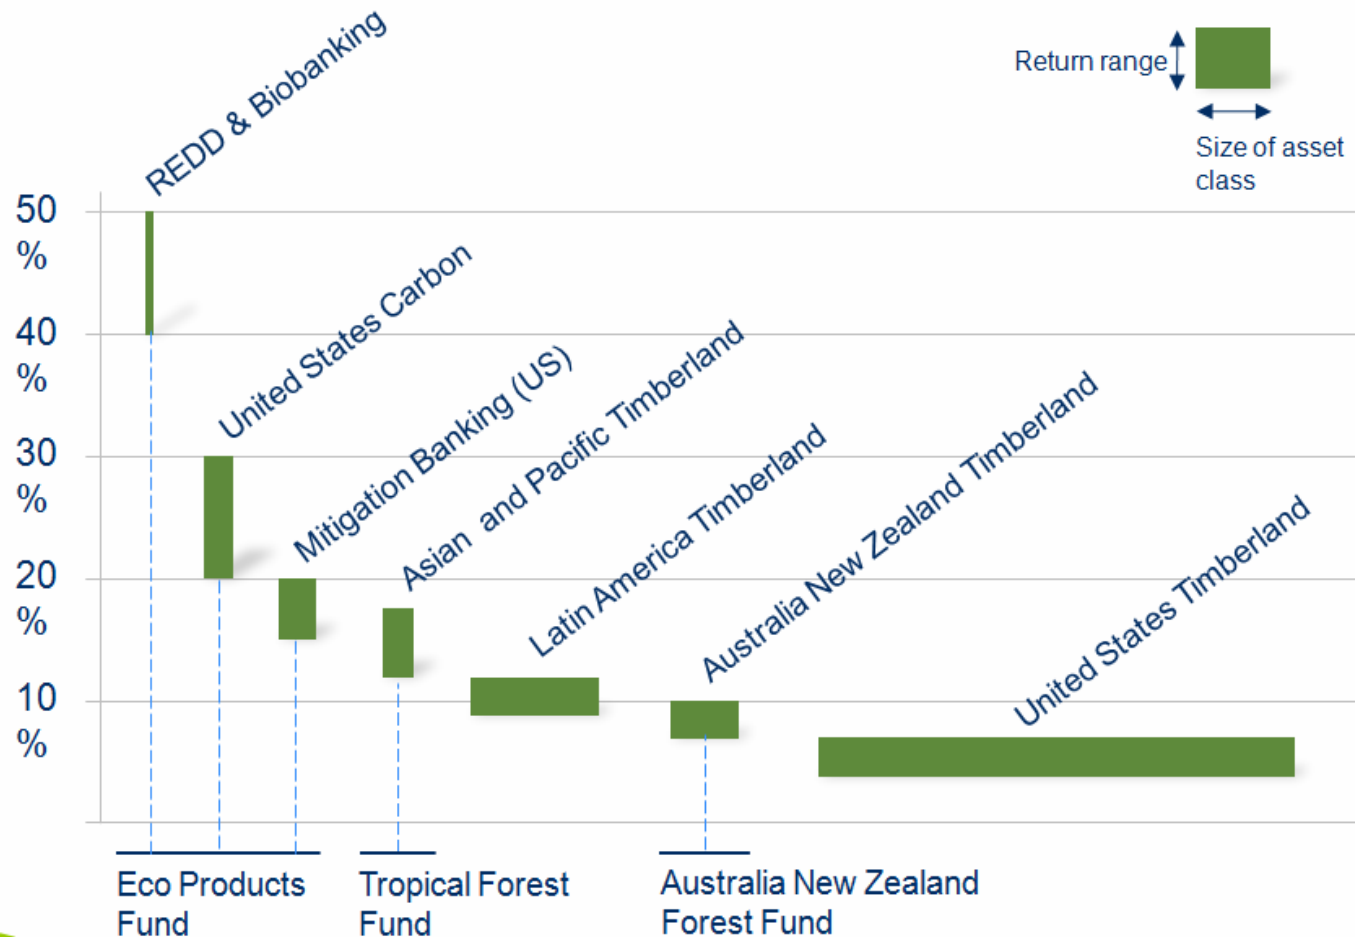

**Certification** by either the Forest Stewardship Council (FSC) or the Program for the Endorsement of Forest Certification Schemes (PEFC) being the two globally acknowledged forest certification schemes is a strong indication for sustainable forestry. The PEFC has endorsed many regional certification schemes, such as Sustainable Forestry Initiative (SFI) and Canada's National Standard for Sustainable Forest Management by the Canadian Standards Association, both widely accepted in North America.

# New Forst Ecosystems Fund (II)

## Expected returns of various investment strategies

Source: New Forests

# Examples of BES interventions, Robeco

- Core: Engagement
- Water management in the agricultural supply chain
  - Textiles (cotton supply chain)
  - Food, beverage and tobacco
- BES dependant sectors
  - Pharmaceutical industry (forthcoming engagement)
- BES impacting sectors
  - Palm oil
  - Oil and gas
  - Mining

# BES-policy: discussion

1. The basics for policies: are KPI's applicable, what are the proxy's (like CO<sub>2</sub> for resource efficiency)
2. The basics for a level playing field: does NVI do (input) or do we need reliable output-data?
3. (How) do we cross the border between the investments- and the loans-portfolios?
4. Education of staff: how to use their personal commitment into a professional setting?
5. How to use common resources of UNEPFI-members in a pre-competitive environment?

De ultieme droom...

FAIR  
ENOUGH  
FOR ALL  
FOREVER
