Introduction

This is to report our journey for implementing the Principles for Sustainable Insurance of the United Nations Environment Programme Finance Initiative after two years of its launching in Rio de Janeiro.

Most of the information came from the Bradesco Annual Report 2015 which comprises the Bradesco Organization as a whole and was elaborated according to the G4 guidelines for corporate reports of the Global Reporting Initiative (GRI).

Some topics consider information of the Bradesco Organization as a whole because they are related to wider actions and by the moment would not be possible to show those specifically related to the insurance group, as on the financial education and inclusion topic.

Some topics that were object of the first report last year are not contemplated in this report because there are no news or no different figures related to them.

Sustainability Governance

The main forum to discuss themes related to sustainability is the Sustainability Committee which reports directly to the Board of the Bradesco Organization.

In order to follow and check evolution on the insertion of sustainability in our operation and practices the Bradesco Organization adopts the economic and social-environmental indexes from Dow Jones Sustainability Indexes (DJSI), from Indice de Sustentabilidade Empresarial (ISE, from BMFBovespa), from Indice de Carbono Eficiente (ICO2 from BMFBovespa), from Global Reporting Initiative (GRI) and from Protocolo Verde.

Low-income insurance and insurance inclusion

Bradesco Seguros is a member of the MicroInsurance Network (MIN) and belongs to its Distribution Working Group and to its Nominations Committee.

Bradesco Seguros holds the presidency of the CNseg (brazilian insurance industry confederation) Inclusive Insurance Committee, the new name for the former Microinsurance and Popular Insurance Committee.

Bradesco Seguros belongs to the CNseg (brazilian insurance industry confederation) Sustainability and Innovation Committee with two members.

Bradesco Seguros belongs to the CEBDS (brazilian arm of the WBCSD) thematic committees on sustainable finance (two members) and climate (one member).
Bradesco Seguros launched in 2010 a low-income insurance product called Primeira Proteção Bradesco (Bradesco First Protection), initially available only in favela of Rocinha (Rio de Janeiro) and favela of Heliópolis (São Paulo), but now available in the whole territory. Offering coverage for accidental death, funeral assistance and with a lottery component, with a monthly cost of R$ 5.50, has sold since its launching 4,36 million (as of the end of Jun/2016) of insurance contracts.

In 2010 Bradesco Seguros launched a residential insurance – fire, lightening and explosion coverages - specifically addressed to the favela Santa Marta, in Rio, in order to help the program Estou Seguro, an insurance education project conducted by CNseg according with a Microinsurance Innovation Facility (MIF - ILO) grant.

In 2012 Bradesco Seguros won a Microinsurance Innovation Facility (MIF - ILO) grant for a project to improve access to insurance to low-income populations using mobile technology and banking correspondents as distribution channel. This project has been called Bradesco Expresso Premiável and was developed with MIF - ILO supervision and has sold 53 thousand contracts using 802 correspondents (until end of Jun/2014), belonging from the more than 50,000 that compound the Bradesco Bank correspondents universe.

Due to a change on brazilian legislation the commercialization was setted aside in Jun/2014 and a new product was created, a microinsurance product called Bradesco Proteção Premiável, under pilot operation at the end of Jun/2016.

Bradesco Seguros has presented the case, and its further developments, on the 9th and the 10th International Microinsurance Conferences respectively in Jakarta, Indonesia, nov/2013 and in Mexico City, Mexico, nov/2014 (full reports at the Munich Re Foundation website).

Bradesco Seguros has presented its experience on innovation in distribution channels and technology in Guadalajara, Mexico, sep/2013, during the XIII Foro Interamericano de la Microempresa (Foremic) (full report at FOMIN website), an initiative of Multilateral Investment Fund (FOMIN) at Inter-American Development Bank.

Bradesco Seguros was the first insurance company in Brazil to have a microinsurance product approved by SUSEP, the brazilian insurance regulator. Called Microsseguro Bradesco Proteção em Dobro (Microinsurance Bradesco Double Protection), the product offers residential and personal accident coverages plus funeral assistance with premium starting at R$ 4,50/month. The first ticket was sold in favela of Rocinha (Rio de Janeiro). The product has been sold via more than 800 Bradesco Bank branches located in low-income areas across the country.

Bradesco Seguros actions on microinsurance have been recognized in publications from MIN, GIZ and Accenture.

**Auto recycling program**

This program avoids the abandonment of substituted auto parts and scrap iron from car dumps, through partnerships with companies specialized in collecting and recycling such materials. The partners collect the material from repair shops
and destine them to appropriate recycling venues promoting the environmental protection and generating revenue to low-income families.
Since its launching in 2009 has managed more than 11 thousand tons of material.

**New Bradesco Seguros headquarter building**

The new building – located in Alphaville, city of Barueri, São Paulo state – was projected and constructed accordingly to the most modern rationalization criteria on natural resources and is certified as LEED Gold for New Construction by the US Green Building Council.

**Longevity**

Longevity Circuit: This initiative promoted the participation of 55 thousand people in 2015 and the total of over 400 thousand people up to the end of 2015 and since its beginning in 2007. Besides the circuit itself this activity generates in each city where it happens researches that generate information and ranking regarding quality of life in each of those places.

Bradesco Seguros was the sponsor in 2013 of the annual meeting World Demografic & Ageing Forum (WDA), that happened in Brazil for its first time. Since 2014 Bradesco Seguros hostes the International Longevity Forum at its premises in Rio de Janeiro.

Longevity Forum: The 10th edition happened in oct/2015 with more than 500 participants in loco and direct Internet transmit.

**Accessibility**

Disabled people (audio) have, since 2011, access to Bradesco Website and Facebook page through the Brazilian signal language (Libras) and in 2013 Bradesco Seguros launched the ProDeaf Móvel (Mobile), addressed to smartphones and tablets, which converts Portuguese into Libras.

Bradesco Organization launched in 2012 at a Shopping Mall in São Paulo an especial space called Bradesco Next, showing to people new technological solutions and has received until the end of 2013 a total of 164.806 visitors. At that place was launched in nov/2013 an app specially designed for the Google Glass that makes possible localizing, among other things, hospitals linked to Bradesco Health insurance system. Nowadays the Bradesco Next is a mobile space as a way to implement the iniciative.

**Financial Education and Inclusion**

Bradesco Organization use to promote meetings with the population, respecting the peculiarities of each group of people, focusing financial education and presenting the organization. Those meetings are called Bradesco Regional Meetings and a total of 1,066 of them were promoted since 2012 until dec/2015.
The Organization is present in every municipality of Brazil via normal branches, very small branches (PA) and banking correspondents. So, Bradesco has physical presence in every class of community, including the following favelas: Mangueira, Chapéu Mangueira, Rocinha, Cidade de Deus, Rio das Pedras, Complexo do Alemão, Gardênia Azul, Cantagalo, Turano and Santa Marta (in Rio de Janeiro), and Heliópolis and Paraisópolis (in São Paulo). From the total 3,511 PA’s around 1,600 are located in such communities, attending more than 1 million people. From the total 43,560 banking correspondents around 15 thousand are located in poor neighborhood, fomenting economic operations in such places (where formal financial services are not available) resulting on a monthly input of over R$ 250 million on local economies.

In order to reach Amazon region and especially the people who live along the rivers in that very big region Bradesco has utilized a floating branch (small branch) since 2009, a branch inside a ship called Voyager III. Since then more than 35 thousand banking accounts (savings and normal accounts) were opened and 4.5 million banking operations were executed. The ship goes along 1,600 km in the Solimões river actuating with around 50 very small communities and 11 villages on a total of 250 thousand people.

Since 09/jun/2014 another branch has entered in activity on board of the ship Voyager V. From that day on Bradesco will visit each community every 3 or 4 days. During the visits Bradesco people promote meetings inside those communities learning the concepts related to financial education.

We firmly believe in financial inclusion as a way to contribute to the people access to the financial system and as a stimulus to the regional economies. In this way, and to reinforce the economic dynamic in the region, Bradesco installed two banking correspondents in 2013 inside two native communities.

There are films showing the daily operations of the ships at the website www.bancodoplaneta.com.br

Ecoefficiency

Bradesco Seguros has implementing the use of electronic media for the distribution of its auto and residential policies wordings. Together with other measures, the Bradesco Organization total reduction of paper use reached 510 tons in 2015. The overall organization reduction on electric energy consumption in 2015 was 11,031 MWh, or 2.5%.

Mobility

Due to the Bradesco technological structure, 92% from the total transactions were executed by digital channels in 2015. As a consequence 2.4 million customers have not visited a physical banking branch for more then three months, adopting exclusively electronic media in their financial relationship with the bank. This contributes to the communities life quality because the reduction of displacement needs.
As an example on this topic, in 2015 Bradesco launched a project called “Connected Car” by integrating the Bradesco Exclusive app with the FORD SYNC, allowing, among other applications, localizations of ATM’s via voice command in the car.

Other actions

Integration school company program (PIEE): Bradesco Seguros promotes, jointly with Bradesco Foundation, in Rio de Janeiro the PIEE as a way to stimulate social integration, citizenship and quality of life (for the participants) though the development of cultural and sports activities.

SOS Mata Atlântica Foundation: The objective is to protect the Atlantic rainforest via affinity credit cards and capitalization titles. Bradesco Organization sends to the SOS Mata Atlântica Foundation part of the resources obtained with such operations and the partnership has begun in 1989.

CONVIVA movement: This project was launched and is runned by Bradesco Seguros to promote the harmonic coexistence between car drivers, bike riders and pedestrians, besides encouraging cycling as a sport and a healthy ans sustainable life habit, specially in big cities. That is why Bradesco Seguros actuates with São Paulo City Hall to open new spaces for using bycicles during Sundays and holidays. So, this so called CicloFaixa de Lazer (leasure bike lane) totalizes 120.7km for the time being in São Paulo and 15.5 km in Osasco, a close city. Those actions motivated in 2013 the Rio and the São Paulo editions of the World Bike Tour.

Program CicloSampa: As a natural consequence of CONVIVA this new program was launched on 15/dec/2013 and consists of offering very modern bikes for rent through 15 different points in São Paulo. More details please access www.ciclosampa.com.br

Program Porteiro Amigo do Idoso: In 2010 Bradesco Seguros launched – based on researches conducted in big cities on which elderly people living in apartment buildings said that their best friends was the front desk employee, the doorkeeper, of the building – a program for training those professionals in order to better support and help elderly people in terms of their mobility, security, autonomy and independency. As of jun/2016 the program has trained 2,086 doorkeepers. By now the program has been developed only in the southeast region.
