

AiiM Partners

**Sustainable Blue Economy Finance Initiative
Report
2022**

AiiM Partners invests in technology businesses with evidence of **high-growth and market traction** in the four key sectors of energy transition, alternatives materials, food & agriculture and data & digitization.

In 2022 AiiM has:

1. Invested in companies addressing ocean health and climate change issues through their products and services
2. Taken major investor roles in all of our investments

Looking ahead:

1. We plan to build out detailed research reports on ocean sectors including ocean data, waste, fisheries
2. We are exploring investments in typically underinvested sectors in the ocean and climate change space they have lacked capital but have the potential to generate strong impact, including ocean data, waste, fisheries

As of the writing of this report, we are pleased to share that AiiM's Fund I (**2020 vintage**) portfolio companies continue to be on track to meet or exceed its **science-based climate change and biodiversity goals** in the areas of:

- greenhouse gas emissions,
- dependence on fisheries, and
- plastic waste reduction.
